Chapter 1

Publication tests

Outputs generated from Google Docs and Zotero.

Chapter 2

Research Article Demonstration Document

2.1 Steps involved in the setup

2.1.1 Google Document setup

1. Connect Zotero
2. Set Citation Style: CMOS Author Date
3. Test citation addition
4. Change Zotero language, Citation style
5. Add standard layout parts

2.2 Publishing from Google Docs

2.2.1 Option 1: Output to use Paged Media CSS and Vivliostyle

Zotero linked version - HTML

1. Save document as HTML
2. Upload online - in this case GitHub
3. Read document in Vivliostyle
 1. As A4 - no style - Viewer only
 1. [GDoc](#)
 2. With UNFCCC Style - [UNFCCC style CSS](#) - Report of the Conference of the Parties
 1. [GDoc](#)
 3. With Report Style - [Report style CSS](#) - IPCC Glossary [example publication](#)

1. [GDoc](#)

Zotero unlinked version - HTML

Zotero linked EPUB

2.3 Output Quarto Markdown

2.4 Publish Google Doc

Maths equation:

$$F = G * m1 * m2 / d^2$$

Newton's Law of Gravity states that attractive force (gravity) exists between any two objects.

- F: Gravitational Force, in N
- m1: Mass of Object 1, in Kg
- m2: Mass of Object 2, in Kg
- d: Distance between the two Objects, in m
- G: Gravitation Constant, is $6.67 \times 10^{-11} \text{ N.m}^2/\text{kg}^2$
